

Howto create an item in the menu bar

all files have extension **.txt**

level 1 entries start with **1_** so for menu entry Used Cars the filename is 1_Used Cars.txt

level 2 entries start with **2_**, then repeat the level 1 name and then add **_level2 item name**

example 2_Used Cars_Rotterdam.txt and 2_Used Cars_Amsterdam.txt

The bottom navigation bar

The bottom navigation bar contains 2 items that contain user data

Disclaimer and Contact

All disclaimer text is stored in the file disclaimer.txt

The contact information is stored in contact.txt

Layout of a page

first line is a heading for the page

second line starts with a dot followed by a paragraph heading

then follow one or more lines of text for that paragraph

Start a new paragraph with a dot followed by paragraph heading and text as described above

Macros adding content to your page

<!--TAG> *tag content* **</TAG-->**

Tag	Purpose	Remarks / Example
URL		
IMG	Name; width, height, [caption]	The name is looked up in the file images.txt.
IMGPAGE	Click image and load the page as described in the tag contents	
IMGLINK		
BM		
INLINE		
PASS		

SPECS		
CCT		

Level 2 menu Pages

Whenever you create a level 2 menu the level 1 menu itself is no longer selectable.

You have the option to leave the level 1 page file empty or put some generic data in it.

The level 2 menu page is created just like a level 1 menu page.

Special files

filename	purpose	remarks
_defaults.txt		
_links.txt		
_images.txt		
_contact.txt		
_disclaimer.txt
